

Safety Gate & Bollard Solutions Brochure 2025

Safety is the Solution

At SSS Industrial Doors, we go beyond just supplying high-quality doors; we are dedicated to providing a comprehensive range of security and safety solutions tailored to meet the diverse needs of our clients. With a firm commitment to excellence, our offerings include not only robust industrial doors but also a variety of security products designed to protect your premises effectively.

In this brochure, you will find detailed information on our Sliding Gates, Swing Gates, Bifold Speed Gates, Turnstiles, Speed Lanes, Vehicle Barriers, and Bollards. Each product is built for durability and reliability, ensuring that your property remains secure and accessible. Trust SSS Industrial Doors to safeguard your environment with our innovative solutions.

Sliding Gates

Our sliding gates offer a space-efficient and secure solution for controlling access to residential, commercial, and industrial properties. Designed for both high-security and high-traffic areas, these gates provide smooth and reliable operation with minimal maintenance.

Available in automated and manual models, they are ideal for properties where space is limited or a wider opening is needed. Durable and robust, our sliding gates are built to last and integrate seamlessly with existing security systems.

Swing Gates

Our swing gates offer a versatile and secure access control solution for a variety of applications. Designed for both high-traffic and low-traffic areas, these gates provide a smooth, efficient way to control entry while ensuring safety.

Ideal for office buildings, gated communities, and industrial sites, our swing gates are available in both manual and automated models. Built to last, they provide reliable performance and easy integration with existing security systems.

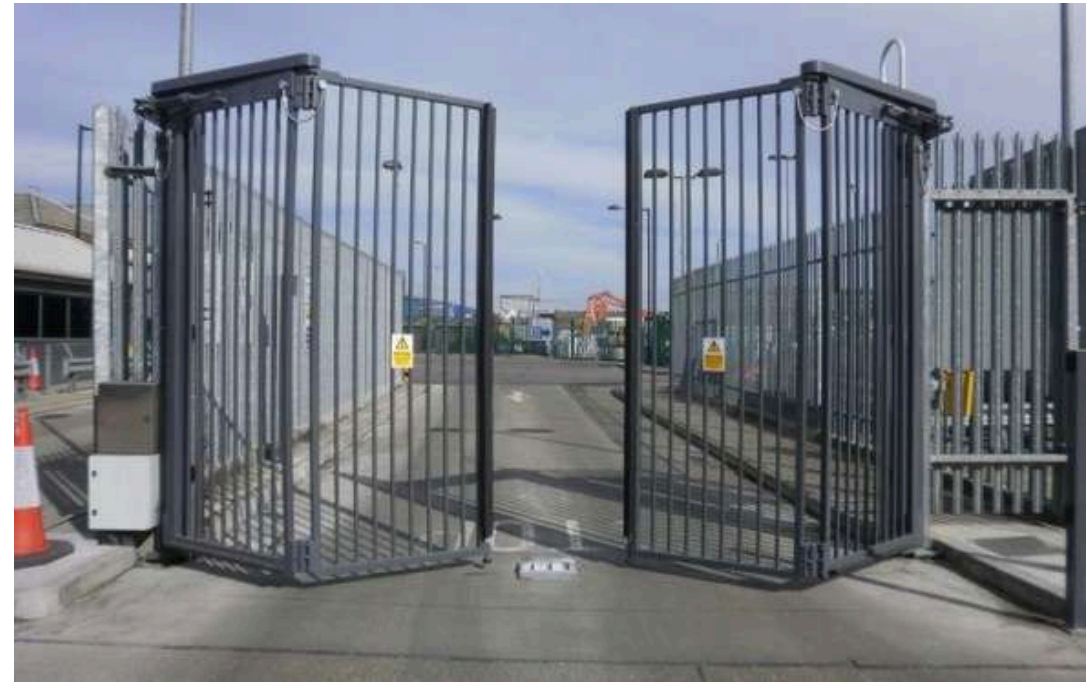

Bifold Speed Gate

Our bifold speed gates combine high-speed operation with secure access control, making them ideal for managing pedestrian or vehicle traffic in high-security areas. With their compact design and fast opening/closing speed, they ensure smooth, efficient entry while maintaining high levels of security.

Perfect for office buildings, airports, and transportation hubs, these gates are available in both automatic and manual models. Reliable, durable, and easy to integrate, they provide an ideal solution for modern access needs.

Turnstile

Our range of turnstiles provides reliable and secure access control for high-traffic environments. Designed to ensure efficient entry management, these turnstiles are perfect for stadiums, office buildings, airports, and other busy public spaces.

Available in both manual and automated models, they offer flexible solutions for controlling pedestrian flow while enhancing security. Durable and easy to maintain, our turnstiles are built for long-lasting performance.

Speed Lanes

Our speed lanes offer efficient, secure, and streamlined access control solutions for high-traffic areas. Designed to quickly and safely manage the flow of people, these systems are ideal for airports, stadiums, offices, and other high-volume locations.

With a range of automated and manual models, our speed lanes ensure seamless entry while maintaining security. Durable, fast, and reliable, they're the perfect choice for environments that demand high throughput and safety.

Vehicle Barriers

Discover our range of high-quality vehicle barriers, offering both automatic and manual models for secure access control. Ideal for controlling entry points, preventing unauthorized vehicle access, or managing traffic flow in high-security areas.

Built for durability and reliability, our barriers are designed to withstand heavy use in demanding environments. Whether you need a simple manual barrier or a fully automated solution, we have the right product to meet your needs.

Bollards

Explore our range of high-quality industrial bollards, including both electric and non-electric models. Designed for durability and security, these bollards are perfect for controlling traffic, protecting property, or managing restricted access areas.

Available in a variety of sizes and styles, our bollards are built to withstand harsh environments. Whether you're looking for automated systems or manual options, we have a solution for every need.
